

Providing Affordable, Effective Communications Solutions

2way Messaging

Mobile Embrace provide outbound messaging as a core service. Some customers want their SMS recipients to respond to their messages. Mobile Embrace provide a 2-way service that allows this to happen.

Benefits

2way messaging allows business customers to capture responses to their messages and forward them to different destinations. 2way messaging makes businesses more efficient and improves operations. You can react more responsively to customers and employees and increase business productivity.

Why 2way Messaging In today's ever increasing mobile business environment it is imperative that organisations obtain business information from employees and customers at lightning speed. It is impossible to gather information via email or via phone from a large group in a timely manner using these traditional communication methods. Mobile Embrace Messaging can gain you a competitive edge by allowing you to collect and forward information fast with minimal resources.

2way Messaging

Recipient responses can be captured, and sent on to a range of destinations:

- We can forward it on to your phone as a text message
- It can be sent to your e-mail account
- You can read it on the web site in your personal reports section
- We can also send the message directly in to your data systems using XML

Typical uses

- Media Contest
 - Field Force Management
 - On Demand Marketing
 - Emergency Response
-
