

## Providing Affordable, Effective Communications Solutions

### Mobile Embrace GuardSMS

GuardSMS allows **encrypted** text messages of up to **3,500 characters** to be sent to web enabled mobile phones with **enhanced security** features.

### Benefits

Peace of mind knowing your sent messages are **encrypted** with **ISO27001** standards and have a complete access control with full audit trail.

---

**Why GuardSMS** | In today's ever increasing mobile business environment more personnel are doing business via laptops and mobile devices away from the secured environment of an office. This creates a situation where sensitive information stored on these devices could potentially fall into the wrong hand should the device be lost or stolen. In such an event, information security could be severely compromised.

GuardSMS provides access to secure communication among business' who are transmitting security sensitive data to their clients and their personnel with the reassurance of our ISO 270001 accreditation for information security.

### GuardSMS Capabilities

Communicate privately when telephone use may not be appropriate. GuardSMS allows text messages of up to 3,500 characters to be sent to web enabled mobile phones with enhanced security features such as:

- Messages sent are encrypted
- Messages are not stored on the mobile phone
- Messages can require a password to be read
- Messages can be set to be read once only, and then 'dissolve'
- Messages cannot be forwarded to another phone.
- Message delivery and read receipt report

### GuardSMS Benefits

- Information security which is not available with email or SMS
- Complete control on access control
- Message encryption to ensure no prying eyes
- Full audit trail on messages to prove who read your message
- Reassurance that your vital information is secure to ISO27001 standards

### Organisations who use Mobile Embrace tell us what they value most

- Peace of mind knowing all communications are secure and have audit trails
- A timesaving, simple, accessible resource via computer and the internet
- Easy integration to existing infrastructure

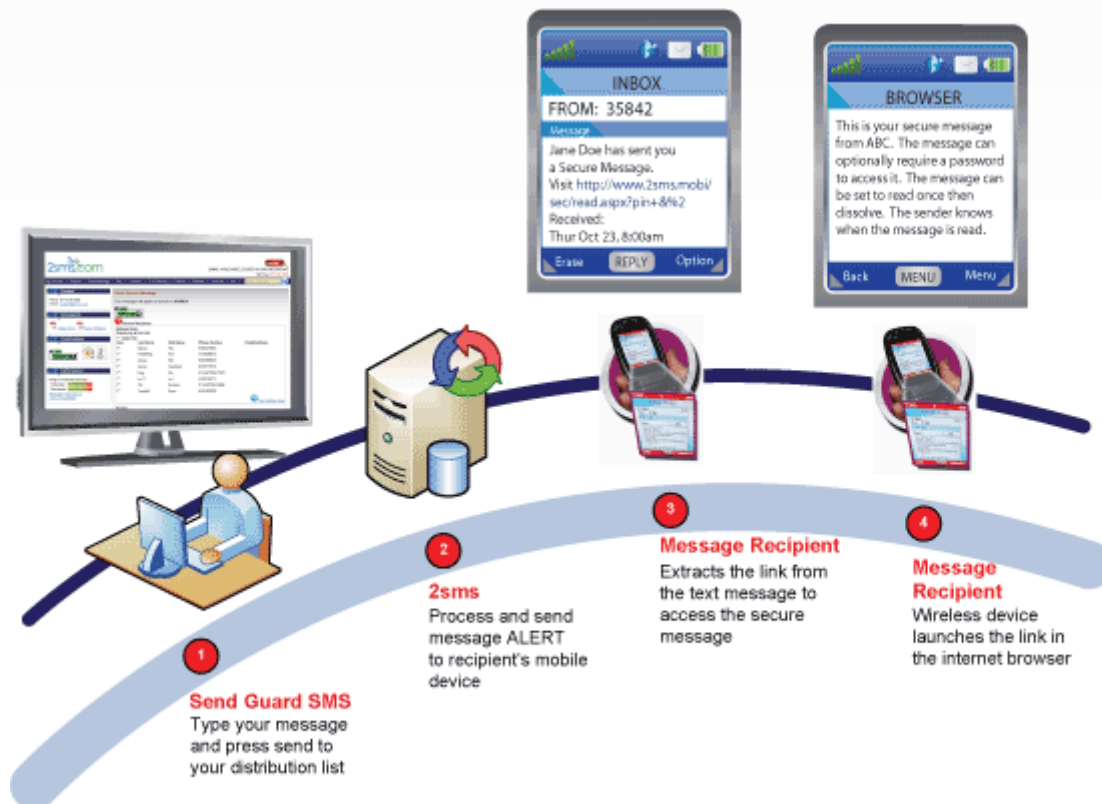

- Gaining competitive edge with faster communication with internal and external clients
